

Patient Information Exchange (PIE)

The Simple Solution for Complex Data Aggregation Environments

Healthcare organizations are struggling to find an efficient way to aggregate and share patient data across the care continuum, as they face increasing pressure to achieve better care coordination, collaboration and interoperability. Anticipating this market need, Anthelio Healthcare Solutions, the leader in world-class healthcare IT products and services, has developed the Patient Information Exchange, a cost-effective data solution that provides physicians with single point access to patient's clinical and financial data from disparate sources.

Patient Information Exchange

- Integrates data from all patient care settings utilizing a user-friendly, centralized data warehouse
- Provides single point access to patient clinical and financial information
- Functions as a Data Organizer and Data Aggregator, exchanging information from disparate systems, including EMRs, enabling interoperability among care providers
- Is physician-patient centric, serving the physician across the entire care continuum
- Works as an analytical tool, providing a patient snapshot and progress record pulled from multiple sources
- Offers a reporting infrastructure to aid in achieving compliance with Meaningful Use

PIE Provides Sustainable Value Through Key Business Advantages

- Reduces time-to-care and improves quality of care by providing single point access to information
- Interfaces with multiple data sources, like census, PACS and EMR, and provides reports, graphs and trends for patient data
- Helps hospital management to manage data for analytics and protects data during migrations
- Significantly reduces dependency on multiple vendors for data.

Technical Details

- PIE is a browser and mobile based, easy-to-use interface solution
- PIE can be connected from virtually any PC/mobile device with secure connectivity
- A secure web-based app, PIE is designed with role-based security features to ensure data integrity and confidentiality

Successful Implementations

Our innovative solution is hard at work in seven McLaren Health Care locations, Adventist HealthCare, Valley Baptist Health System and Saint Mary's Hospital, providing a single, simple view for decision making and managing millions of logins, patient profiles, encounters, lab results and other critical data. Since its launch, PIE has extracted and organized clinical and financial data from a variety of sources such as GE, Lawson, McKesson, Quadramed, and Oracle.

Anthelio Healthcare Solutions

Anthelio is the largest independent provider of healthcare technology solutions in the market. We offer solutions across the spectrum of care, providing customers the ability to solve their critical technology needs from a single source while delivering cost savings and efficiencies. Our end-to-end solutions include IT infrastructure services, IT applications management, EHR optimization, Patient Engagement, Analytics, and Revenue Cycle Management (RCM) including HIM Services, Patient Financial Services and Cancer Registry Services. Anthelio drives sustainable value to over 63,000 physicians and nurses in hundreds of healthcare organizations supporting their annual revenue of over \$67 billion and impacting quality care to over 60 million patients.
